Claims 12-14 drawn to a multi-channel setting apparatus that is applied to a multi-channel input system for making cordless connection between a plurality of terminals and a plurality of input apparatus wherein the multi-channel setting apparatus comprising a management unit, a setting unit, classified in class 455, subclass 179.1.
2. Inventions group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group

group II has a separate utility such as a setting unit, classified in subclass 179.1. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
